

Getting to the right problem from the point of view from the insights and needs of the customer

Objective

To be able to determine the right problem and reframe it from the point of view (POV) and insight of the user

Many innovations fail **not because of a fatal flaw in the innovation itself, but because the company **fails to understand the problem they are solving****

Segway: a transportation device for everyone. Not determining which users have a problem requiring the attributes of a Segway

Google Glass: A mobile device for everyone. Not determining which users have a problem requiring it

GLASS

“....Google didn’t improve Glass in specific ways for an application to attract users from a target market to buy Glass. In the end, by trying to be a “cool tool” for everyone Glass ended up being something nobody really needed”

-Forbes, Feb 12, 2015, Adam Hartung

Apple Watch: What **problem are they trying to solve and for **whom**?**

**What is the right
problem?**

Incubators for 3rd world rural regions

Image credit: Anne Geddes

Is this the problem?

**Rural clinics in India, Bangladesh,
Nepal, Cambodia and Indonesia**

**need a much lower cost and
maintenance free incubator**

**so that they can prevent premature
babies from dying.**

Neonature Incubator

Problem point of view: what?

**a unique, concise reframing
of the problem that is
grounded in user needs and
insights (empathy)**

point of view: components

user be specific

need use verbs

insight observation + interpretation

The Problem

user a desperate parent living in a remote village who

needs the means to give her dying baby

insight (empathy) a chance to live

- Inexpensive**
Less than 1% of the cost of a standard incubator
- Durable**
Can be reused up to 50 times
- Portable**
Can be used while the baby is held in the mother's arms or during transport
- Hygienic**
Easily cleaned using soap and water
- Safe**
Simple and intuitive to use, validated through routine safety testing and extensive clinical trials
- Effective**
Incorporates an innovative phase change material to rapidly stabilize the temperature of an infant suffering from hypothermia

Embrace launches a rapidly growing program in Afghanistan in government hospitals with some of the worst infant mortality rates in the world, in partnership with the NGO Health, Education, and Economic Development for Afghanistan.*

In India, Embrace launches a rapidly growing program in Uttar Pradesh's Raebareilly District, in partnership with the district government, and with the generous support of funder Narayana Murthy and the technical guidance of Rajiv Gandhi Mahila Vikas Pariyojana, a local development organization.

Embrace now has programs in 11 different countries, and has reached over 50,000 low birth weight and premature infants.

As a team reformulate your **problem** statement.

insight (empathy) observation +
interpretation

Problem

Increasing the knowledge and awareness of "best practices" in innovation in your company

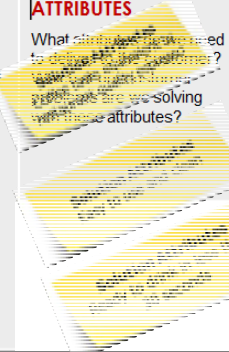

A photograph of two glowing incandescent light bulbs on a laboratory bench. The bulb on the left is dimmer, while the one on the right is brightly lit. In the background, there are technical diagrams and a chalkboard with some writing. A small letter 'a' is visible on the bench surface between the two bulbs.
